

The Cake is a Lie

David Hashe

Each criterion contains a food item; since the cake is a lie, all food items that are a form of cake are false, and all other food items are true. This leads to the truth table below.

Maximal Science Criteria	Truth
A stalk of wheat has more of a backbone than Wheatley, so for motivation reasons he should not be matched with silence.	T
Wheatley is more pathetic than a sponge. Science could benefit from his reaction to silence.	F
Test chamber 17 should start with the lowest level of deadly neurotoxin. Any other experiments would not be fruit-ful for science.	F
Test chamber 17 would benefit from either silence or techno music. Those tested best with the automatic acid dispensers. The other options would be positively challah-ble.	T
The Companion Cube and Chell share a special bond that it'd be a real pita to break. Both their neurotoxin levels should be even numbers.	T
Under no circumstances should the test subject who is given the highest level of deadly neurotoxin be exposed to smooth jazz. Death by neurotoxin should not have the ambiance of a coffee shop.	F
Pairing test chamber 37 with the lowest level of deadly neurotoxin would be nearly as bad as pairing Chell with ice cream.	F
Chell could stand to lose a pound or two. Maybe a prime-numbered testing chamber would change that.	F
A birthday doesn't mean much when you're abiotic. Neither does deadly neurotoxin. Give P-body at least level 3.	F
The Companion Cube is almost as fond of techno music and pumpernickel as it is of you. We can give it that, can't we?	T

Completing the logic puzzle leads to the grid below, where correct pairings have been boxed. Reading across the rows yields the clue phrase **CHOCOLATE OR LEMON RING CAKE**, which yields the answer **BUNDT**.
